

D3100

Elevate Your Photography to Beautiful New Heights

• Lens: AF-S DX NIKKOR 18-55mm f/3.5-5.6G VR • Exposure: Shutter priority auto, 1/2000 second, f/6.3 • White balance: Auto • ISO sensitivity: 200 • Picture Control: Vivid

A moving experience in digital photography that everyone can enjoy.

Easily capture the beauty of life's fleeting moments with the new D3100. A feature-rich digital SLR camera that surprises you with simplicity, and positively delights with superb results. Whether shooting casual snapshots, a delicately composed still life or full HD movies, you'll love the ease with which D3100 does it all.

- DX-format, 14.2 effective megapixel CMOS image sensor
- EXPEED 2 Nikon's new image processing engine
- ISO sensitivity 100-3200 (expandable to ISO 12800 equivalent)
- Guide Mode
- D-Movie Full HD 1080p movie shooting
- 3-in. monitor and Live View shooting

The camera that amazes. Shoot with D3100 and enjoy the beauty.

Softly defocused backgrounds that only a D-SLR can produce

DX-format, 14.2 effective megapixel CMOS image sensor NEW

Nikon equipped D3100 with a newly developed CMOS sensor for outstanding subject detail and smooth color gradation. Whether shooting photos or full HD movies, the sensor is crucial to image quality. The high pixel count of D3100's sensor produces photos of striking clarity, revealing all the nuance of the original scene with minimum noise — ideal for intricately detailed textures and grain-free background defocus.

EXPEED 2

Exception Details

Faithful Color

Faithful color reproduction and smooth, beautiful gradations

•EXPEED 2 – Nikon's new image processing engine NEW

Welcome to a new level of excellence with EXPEED 2. We've leveraged our vast technological know-how to bring you Nikon's most advanced image processing engine yet. EXPEED 2 maximizes CMOS sensor performance for clear, lifelike images that exhibit vivid colors, reduced noise and smooth tonal gradations for outstanding photos and movies.

> Dazzling Low-ligh Photos

Great performance and less blur in dimly lit settings

ISO 3200

ISO sensitivity 100-3200 (expandable to ISO 12800 equivalent)

A maximum ISO of 3200 (standard range) lets you shoot at fast shutter speeds, reducing camera-shake blur in dimly lit scenes. Twilight and indoor shots come alive with a refreshingly natural look without the need for a tripod or flash. Moreover, fast shutter speeds make it easy to freeze action in dynamic situations such as children at play and sports events. For added versatility, D3100's Hi 1 and Hi 2 settings effectively boost ISO to the equivalent of 6400 and 12800, respectively

Hi 2 (ISO 12800 equivalent)

• Lens: AF-S DX NIKKOR 18-55mm f/3.5-5.6G VR • Exposure: Aperture priority auto, 1/125 second, f/5.6 • White balance: Auto • ISO sensitivity: 100 • Picture Control: Vivid

Enjoy the Ease

The camera that teaches you how... Let D3100 satisfy your dreams of better photos.

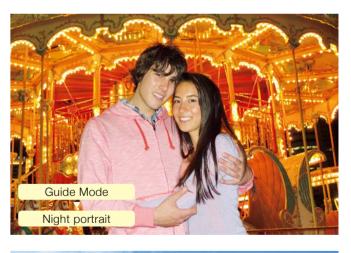

• Lens: AF-S DX NIKKOR 35mm f/1.8G • Exposure: Aperture priority auto, 1/1600 second, f/2.2 • White balance: Auto • ISO sensitivity: 400 Picture Control: Portrait

The joy of simplicity. Shooting great photos and full HD movies was never so easy.

New AF modes capture moving subjects

Live View with new AF modes and large 3-in. monitor

Live View gives you an intuitive, familiar way to photograph playful pets or children on the move. Just flip a switch and you're ready to go. When Live View is activated and new Fulltime-servo AF (AF-F) is selected, the camera keeps subjects in focus without having to press the shutter-release button convenient for photos and movies. There is also new Facepriority AF that locks focus on faces, even on people not directly facing the camera. Live View makes D3100 as easy to use as a compact camera.

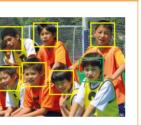

NEW

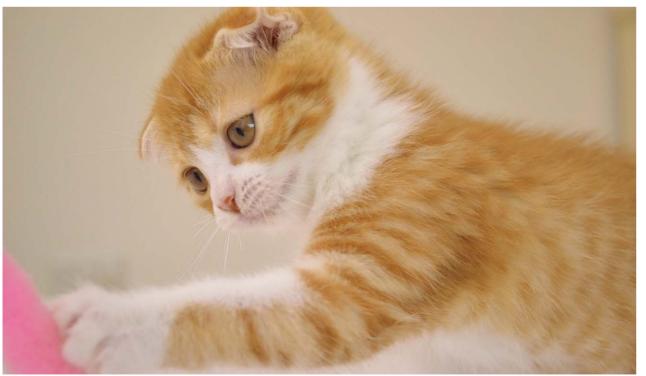

Autofocus automatically begins after Live View is activated, tracking the subject continuously without having to press the shutter-release button. Note: When shooting movies, noise from the lens motor may be recorded.

Face-priority AF

The camera can recognize up to 35 faces at a time then focus on the face that is determined to be nearest. Even if people in the frame move, the camera continues tracking and focusing.

• Lens: AF-S DX NIKKOR 18-55mm f/3.5-5.6G VR • Exposure: Sports mode, 1/500 second, f/5.3 • White balance: Auto • ISO sensitivity: Auto (900) • Picture Control: Standard

Letting D3100 decide the best mode to match the scene

Scene Auto Selector

D3100 automatically selects the Scene Mode that matches the shooting situation and subject. During Live View shooting with the Mode dial on Auto or Auto (flash off), Scene Auto Selector* automatically activates Portrait, Landscape, Close up or Night portrait modes depending on the scene. For added convenience, an icon appears in the top-left corner of the LCD monitor that shows the selected mode.

Breathtaking full HD 1080p movies

D-Movie – Full high-definition quality NEW

Discover the difference a digital SLR makes when shooting movies. A wide selection of NIKKOR lenses gives you freedom to explore different angles and obtain lovely defocused backgrounds while D3100's advanced imaging system assures outstanding quality. And for action sequences, new Subject-tracking AF keeps subjects properly focused. After the shoot, view movies on the large 3-in. LCD monitor and perform simple editing tasks like trimming scenes before or after a designated point and extracting still images. HDMI compatibility* lets you connect D3100 to an HDTV with playback managed by the TV's remote control**. * Via HDMI miniport. ** HDMI CEC-compatible TVs only.

Nikon technology. The key to effortless shooting and satisfying results.

Quick, accurate autofocus ready for the decisive moment

•11-point AF system

D3100's precision high-speed autofocus responds immediately to changes in scene or composition, maintaining tack-sharp focus to capture fleeting expressions and fast-moving sports. The allimportant central focus point features a cross-type sensor while the new superimposed display achieves a clear, uncluttered viewfinder. Various autofocus modes cover nearly any situation, including autoarea AF that automatically selects the subject on which to focus, and 3D-tracking* that maintains focus on a subject regardless of changes in composition as long as the shutter-release button is pressed half way. * When autofocus is set to AF-A or AF-C.

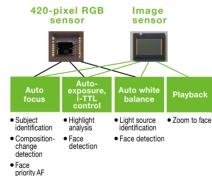

Note: The 11 AF points shown here are for illustration purposes only. Actual appearance

Intelligent operation in any setting

Scene Recognition System

Nikon's exclusive Scene Recognition System utilizes a 420-pixel RGB sensor to analyze a composition immediately before you take the shot. It then automatically optimizes exposure, autofocus, and white balance, allowing you to obtain beautiful photos without the hassle of making complicated camera adjustments yourself. Face detection also benefits from Scene Recognition System, exhibiting improved recognition accuracy and definition as well as enabling instant zoom-to-face in playback mode.

Beautiful balancing of light and shade

Active D-Lighting

Shooting in bright sunlight often produces pictures with extreme contrast between light and dark areas, resulting in loss of tone

and detail. Active D-Lighting effectively combats this by preserving important details in shadows and highlights. The results are optimally exposed photos that better reflect the scene as you saw it.

Without Active D-Lighting

With Active D-Lighting

Customizing images before the shot

Picture Control

Expand creative expression with Picture Control. Six settings - Standard, Neutral, Vivid, Monochrome, Portrait and Landscape - let you determine the look of photos and full HD movies before you shoot. In addition, sharpness, contrast, brightness and saturation can be adjusted to customize settings.

Natural lovely skin tones

In-camera image and movie editing

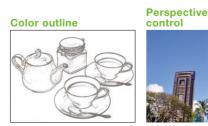

Ample image and movie editing functions

Heighten your photographic enjoyment with D3100's wide range of image and movie editing functions. Operations like Red-eye correction, Quick retouch, and Filter effects can be done in-camera, eliminating the need for a PC and enhancing convenience. You can also extract still images from movies and trim unnecessary frames.

Makes pictures appear as if they are photos of miniature scale models; especially effective when shooting landscapes from above.

Converts a photo into an outline image, which can be printed then look hand-colored

Corrects the perspective of shapes (like buildings) for a more natural

Anytime, anywhere. The right features for comfortable shooting and playback.

Additional light whenever needed

Built-in pop-up flash

When the light gets low or you find yourself shooting in tricky backlit lighting, use the built-in pop-up flash to brighten the scene. It activates automatically when needed depending on exposure mode*, or can be enabled manually. In addition, support for i-TTL flash control increases exposure accuracy.

* When Scene Mode is set to Auto, Portrait, Child, Close-up or Night portrai

Prevent dust from ruining photos

Nikon Integrated Dust Reduction System

D3100 is equipped with Nikon's Integrated Dust Reduction System. This solution includes a special Airflow Control System that redirects dust away from the low-pass filter located in front of the image sensor. Additionally, when powering the camera on or off, the filter automatically vibrates at precise frequencies to release imagedegrading dust that may adhere to it.

Smart image management with a PC

ViewNX 2 software — Your imaging toolbox (bundled) NEW

ViewNX 2 is the convenient way to manage images, providing functions for storing, browsing, editing and sharing photos as well as movies. You can also attach labels to images to facilitate searches. This bundled software offers a wide range of editing functions, including rotate, re-size, crop, straighten, auto red-eye correction and more. Movie editing functions include the ability to delete scenes. ViewNX 2 integrates seamlessly with my Picturetown for simple, drag-and-drop uploads and online browsing.

Intuitive operation for the finishing touch

Capture NX 2 software — Expanded creative control (sold separately)

Capture NX 2's easy-to-learn editing tools unlock image potential without degrading original image quality. This software is ideal for optimizing Nikon NEF (RAW) files as well as JPEG and TIFF images. With award-winning U Point® technology, tedious editing procedures are easier than ever.

Guide number	Approx. 12/39, 13/43 with manual flash (m/ft, ISO 100, 20°/68°F)
Flash control	 TTL: i-TTL balanced fill-flash and standard i-TTL flash for digital SLR using 420-pixel RGB sensor are available with built-in flash and SR-900_SR-900_or SR-900_or SR-900 (LTTL balanced fill-flash is available when matrix
	with built-in flash and SB-900, SB-800, SB-600, or SB-400 (i-TTL balanced fill-flash is available when matrix or center-weighted metering is selected)
	 Auto aperture: Available with SB-900/SB-800 and CPU lens
	Non-TTL auto: Supported flash units include SB-900, SB-800, SB-80DX, SB-28DX, SB-28, SB-27, and SB-223 Distance-priority manual: Available with SB-900 and SB-800
Flash mode	Auto, auto with red-eye reduction, fill-flash, auto slow sync, auto slow sync with red-eye correction, and rear curtain with slow sync
Flash compensation	-3 to +1 EV in increments of 1/3 EV
Flash-ready indicator	Lights when built-in flash or optional flash unit such as SB-900, SB-800, SB-600, SB-400, SB-80DX, SB-28DX, SB-50DX is fully charged; blinks for 3 s after flash is fired at full output
Accessory shoe	ISO 518 hot-shoe with sync and data contacts and safety lock
Nikon Creative Lighting System (CLS)	Advanced Wireless Lighting supported with SB-900, SB-800, or SU-800 as commander; Flash Color Informatic Communication supported with built-in flash and all CLS-compatible flash units
Sync terminal	Sync Terminal Adapter AS-15 (available separately)
White balance	
White balance	Auto, incandescent, fluorescent (7 types), direct sunlight, flash, cloudy, shade, preset manual, all except prese manual with fine tuning.
Live View	munder Hier mit kunnig.
Live View Lens servo	Autofocus (AF): Single-servo AF (AF-S); full-time-servo AF (AF-F) Manual focus (MF)
AF-area mode	Face-priority AF, wide-area AF, normal-area AF, subject-tracking AF
Autofocus	Contrast-detect AF anywhere in frame (camera selects focus point automatically when face-priority AF subject-tracking AF is selected)
Scene Auto Selector	Available in auto and auto (flash off) modes
Movie	
Metering	TTL exposure metering using main image sensor
Metering method	Matrix
Frame size (pixels) and frame rate	 1.920 x 1.080 (24p); 24 fps (123.976 fps) 1.280 x 720 (25p); 25 fps 1.280 x 720 (24p); 24 fps (23.976 fps) 640 x 424 (24p); 24 fps (23.976 fps)
Maximum recording time	10 min.
File format	MOV
Video compression	H.264/MPEG-4 Advanced Video Coding
Audio recording format Audio recording device	Linear PCM Built-in monaural microphone
